

# “HALO” Headwall System

## CHALLENGE:

How to create a clean, modern, user friendly clinical setting specifically created to meet the parent and care-giver needs in the NICU environment?

## SOLUTION

The Paladin “HALO” headwall system. With state of the art lighting integration for user specific environmental control and equipment management to facilitate the interface of family/ staff/technology.

Easy to install  
Single point connections  
Soft feed gas distribution to outlets  
Integrated with Fairfield-style equipment rail

- ✓ *Focused on creating the ideal developmentally appropriate environment*
- ✓ *State of the art lighting integration*
- ✓ *Equipment management to clear the floor of technology for parental and staff access and facilitating easy cleaning of the floor while the infant is in place*
- ✓ *Adaptability to cost effectively manage changing technology and user needs*
- ✓ *Expandability to quickly add essential services during acuity changes, multiple births. and other unforeseen events*
- ✓ *Independent flexible lighting which can be used by both staff (exam) and family (reading) etc.*
