

“REVOLUTION” WITH “EVOLUTION”

Promote lifecycle flexibility with the combined headwall and equipment rail management systems.

Gases and Electrical placement are standard or customized. Supply panels can be changed to meet future requirements.

Equipment, accessories, and materials will be changed, upgraded, and relocated as required and at will using the Evolution Rail System. Evolution is built-in to the Revolution Headwall and is used as management tool above and below the Revolution unit.

Further promote clinical excellence and infection control with the use of “Evolution” on the side walls for maximized materials management. Place things:

- Where They Need It
- When They Need It
- So They Can Easily Find It

**The comprehensive
LIFE-CYCLE SOLUTION**

“Revolution” with “Evolution” Solution
