

“Evolution” Fairfield-Style Equipment Rail

CHALLENGE + SOLUTION:

The design community has long extolled the virtues of vertical management in environments challenged for space. Given the current drive toward maximized use with reduced square footage, the “Evolution” rail system provides the ideal solution for clinical applications.

“Evolution” creates a component-based system for items usually found wall mounted, in carts, or on rolling stands that take up valuable floor space.

Install a highly organized, flexible, adaptable, and expandable system that:

- Increases clinical efficiency when time is critical
- Reduces HAI’s
- Creates par level inventory and controls unnecessary waste
- Manages Equipment
- Provides clear floor space, reduces trip hazards.
