

# Equipment Management for the Real-Life NICU Environment

# PALADIN HEALTHCARE®

## CHALLENGE:

### How to optimize family and workspace in the NICU?

We strive to create an ideal environment that provides the best conditions to support the optimal development of infants in the NICU

## SOLUTION:

### Paladin Healthcare

- Accessories which support the NICU specific technologies such as blenders and associated respiratory care items.
- Organizing all clinical support technology on an equipment rail for optimized work-flow placement
- Free-up floor space for Parental access to the infant, improved safety, and infection control.
- Support Family Integrated Care initiatives
