

Paladin Healthcare LLC enters Veterinary Care/Animal Shelter market

Paladin Healthcare, the leading subject matter expert in equipment management for healthcare environments has now developed solutions specific to the Veterinary/Animal Shelter markets. Not only do our infection control devices and light mounting solutions equally support both human and animal healthcare environments, but Paladin now can also provide specialty solutions such as this cat enclosure.

The rail, hard fixed to the wall, supports the house and shelves for cats to play and jump on. The rail system allows for immediate removal of the accessories in order to hose down or otherwise clean the space, as well as allows for re-location of the platforms to change the scenery from time to time.

At Paladin, NO is NEVER the answer. Please call us today to see how we can support your Veterinary or Animal Shelter equipment management needs.
