

CHALLENGE:

How to provide equipment management flexibility in an environment who's personnel and technology change on a regular basis?

SOLUTION:

Incorporate Paladin "Fairfield Style" Equipment Management Rails on the front end of the design process. This will allow users, at time of occupancy, to place devices and technology in the most optimal locations based on the actual space and need.

Paladin Healthcare has been honored to serve the global healthcare mission of the United States Department of Defense and the Veteran's Administration. We are proud to provide customized clinical interface solutions manage ever changing technology and workflows. Paladin continues to design and develop cutting edge products to meet both static and forward deployed mobile medical equipment management requirements.
